

Unify your risk landscape with OpenERM

## Integrate & visualize

Connect strategic, operational, financial, and compliance risks on a single, intuitive platform. Break down silos and see dependencies across your entire risk portfolio in real-time

## Build Resilience

Proactively identify threats and opportunities, turning risks into a strategic advantage. Transform uncertainty into competitive edge with comprehensive scenario planning

We help you compete providing you enterprise-wide risk and compliance initiatives into a single unified risk intelligence platform. **The Control Center for your Beta Program.**

*Our Unified Risk Intelligence platform provides support for*

1. Operation Risk Management
2. Business Continuity Management
3. Data Privacy Management
4. Risk Management for ESG
5. Financial Controls Management
6. Model Risk Governance
7. Policy Management
8. IT Governance
9. Internal Audit Management
10. Regulatory Compliance Management
11. Third Party Risk Management

We build transparently showcasing our capabilities. Would you like to support us? Write to us at [legal@betaori.com](mailto:legal@betaori.com)

**Interested to volunteer or work with us? Drop an email [controlz@betaori.com](mailto:controlz@betaori.com)**

Fractured data, redundant controls, and conflicting reports create blind spots that threaten your small and medium business.

## Make Confident Decisions

Gain real-time insights and predictive analytics to steer your organization with clarity. Leverage data-driven intelligence to anticipate challenges before they impact your business

## Streamline Compliance

Automate reporting and enhance adherence with centralized framework. Reduce manual workload while maintaining audit-ready documentation across all regulatory requirements.

**Are you paying \$300,000 USD or more for a unified Solution?**

*We just created a level playing field for small and medium business owners. At a fractional cost. We accelerate your path to Product-Market Fit. We are also including Geospatial Dimension to your data, as we are researchers from Geoscience space.*

*The Operating System for Enterprise Resilience powered by β ORI Inc. Canada. We are a minority owned business and open for consulting. We have been building transparently and showcasing our capabilities and skills.*
